

CITRUS

DANNI DA FREDDO*. I danni da freddo sugli agrumi si manifestano con macchie brune sull'epidermide. Non risulta correlazione tra la delicatezza della buccia e la comparsa delle macchie, in quanto tali danni si sono verificati anche su frutti "rustici", dotati cioè di una epidermide spessa. Al contrario, alle medesime temperature, frutti con epidermide più delicata, non hanno manifestato alcun danno.

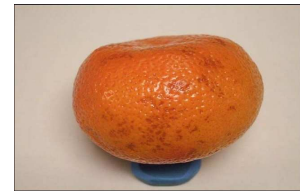

STAINS CAUSED BY THE COLD*. We enclose citrus photos with stains caused by the cold stress in gardens. There is no relation between the delicacy of the peel and the stain, because there are fruits stained that are more "raws" with a more thick peel than some harvests and it's happened that fruits with a more delicacy peel to the same temperatures haven't been stained.

*Danni su clementine:

Su arance

stains on clementines:

On oranges:

Stress da temperatura e ristagni di umidità su agrumi cerati **Stress** thermo/hygrometric on coated fruit
